

BEES AND BUTTERFLIES

Learn about your friendly neighbourhood pollinators.

This week's activities: Honeycomb – Folded Butterfly

Honeycomb

Suggested Materials:

- Paper towel roll
- Yellow paper
- Black marker (or crayon)
- Glue (or tape)
- Scissors

Directions:

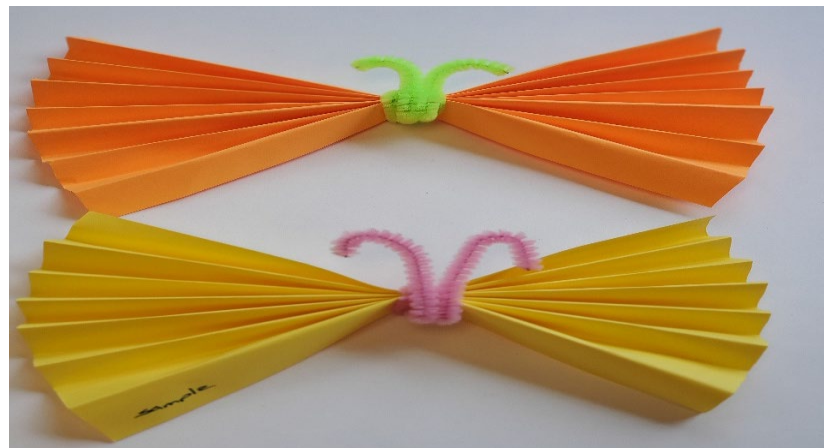

Honeybees use beeswax and pollen to make their hives. Each cell is used to store food or baby bees. Here's how you can make a hive:

1. Cut the paper towel roll into ½-inch thick sections. Bend them in half, then bend them in half the other way to make a diamond shape.
2. Arrange the honeycombs in a beehive shape on the yellow paper. When you're happy with the design, glue or tape them in place and let dry.
3. Draw some bees around your hive.

Folded Butterfly

Suggested Materials:

- Coloured paper 8½" x 11"
- Pipe cleaners
- Scissors
- Pencil
- Coloured markers

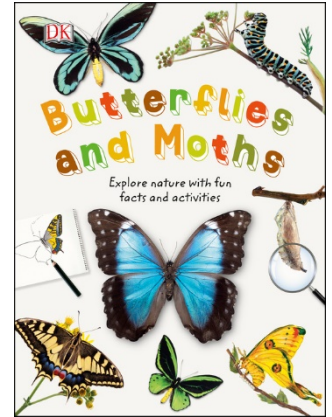

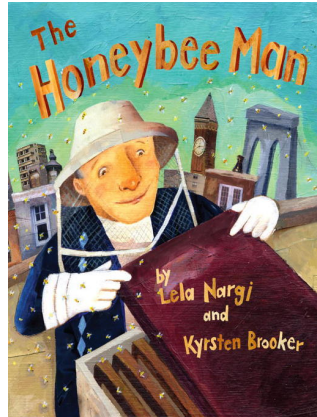

Directions

1. Fold one or two sheets of paper into two-inch folds, then fan it. Try combining different colours.
2. Once folded, take a pipe cleaner folded in half and wrap it around the centre. Separate the open end and curl it to look like an antenna.
