

Clue Set Three

Begin at the place of the power.

	A	B	C	D	E	F	
Latitude Offset	///	///					=14
	G	H	I	J	K	L	
Longitude Offset							=24

Clue #1

Find the only move for white that will not result in the immediate checkmate of the black King. Note the space the piece would move into as (x,y).

$$z = (x)^y \times y$$

Place the digits z in H and E.

Clue #2

My gnomon lets bright Helios cast the time
 A displacing Greek and Priestley teach nearby.
 A scholar's road doth my north border frame
 with a garden for a student named.
 Subtract the last digit of my latitude enscribed
 from the last two digits of my longitude,
 likewise described.

Place the two digits in C and F.

Clue #3

The August arrangement of this melody contains a letter. Find its numeric spot in the alphabet. Add 9.

Place the two digits in G and I.

Clue #4

Of the amicable numbers, we are the smallest, and I the lesser twin.

Take my first two digits, and your solution win.

Place the answer in J and L.

Clue #5

I stand by Plains, ringed by death and gardens.
 I Herald a Bay-bound race o'er a century run.
 A nautilus spiral marks the ground beside me.
 And marked me too, all those whose race is done.
 Add 35 to the number cut into me.

Place the answer in K and D.

Reader, use the offsets you've uncovered to take you to a new destination. I ask you do that by adding them to the coordinates of the place of power.

You will find yourself, as I did, near a history plaque that speaks of manufacturing. Use the six-letter word in the company's name and combine it with the last name of the owner of the firm that on this spot cast McFarlane's engine. Use the words to decode this cipher:

VLYDNPCKXCSDPMVTVBGEFZYD

The answer will place in your hands two digits that will guide you to my nautilus gears' place of concealment. Onward!

Clue Set Two

Begin at the place of the standing stone.

	A	B	C	D	E	F	
Latitude Offset	///						=21
	G	H	I	J	K	L	
Longitude Offset							=12

Clue #1

16			13
	10	○	8
	15		

A touch of melencolia may help those who seek to fill the circle of this magic square.

Place the digits of the answer in H and E.

Clue #2

Below these numerals came the masses, their journeys just beginning. From strife and harm, with babes in arms, more sinned against than sinning. Convert the Roman characters to digits.

Place the last two digits in C and L.

Clue #3

Sum the atomic numbers of these three elements.

Place the answer in B, K and G.

Clue #4

A mosaic of white in a half-wrought circle
I speak of birth and restoration
A checkered edge and rosettes two
at a meeting of streets on a Block renewed.

Subtract the lesser from the greater of the dates here, then remove the number of Mary B. McQuesten's children in 1890, then subtract another two.

Place the answer in D and F.

Clue #5

The number of the sonnet that contains the line:
"And Time that gave, doth now his gift confound."

Place the answer in I and J.

Reader, use the offsets you've uncovered to take you to a new destination. I ask you do that by subtracting them from the coordinates of the standing stones.

You will find yourself, as I did, near a plaque, fourth from the left or right of seven. Use the three English words beneath 1859 to reveal the meaning of this cipher.

UGLBLQTSCHACLELESNCJLEGNTKCKLEDCUSK

The answer will place in your hands two digits that will guide you to my nautilus gears' place of concealment. Onward!

Clue Set One

Begin at my home in downtown Hamilton:
43.258915, -79.865911

	A	B	C	D	E	F	
Latitude Offset	///						= 13
	G	H	I	J	K	L	
Longitude Offset	///						= 5

Clue #1

In the diagram below, calculate the length of the diagonal AD.

Place the digits in J and L.

Clue #3

The Heights of Burlington in Hamilton abide.
War's bitter cost, a garden lost with Paradise close by.
Raised on copper, resting on stone, I speak of loss and illness.
These symbols share my verdant space and weather time with stillness.

Take my last two digits and from them subtract two.
The outcome yields a fragment of the answer you pursue.

Place the answer in H and F.

Clue #2

The sixth prime number plus the lines in a villanelle.

Place the answer in E and I.

Clue #4

The number of pillars on the front of Laird A.N.M's mansion.

Place the answer in B and D.

Place the answer in C and K.

Clue #5

The number of roosts in the dovecote near where Sophia once lived, minus the sum of the square of the first three prime numbers.

Reader, use the offsets you've uncovered to take you to a new destination. I ask you do that by adding them to the coordinates of my abode.

You will find yourself, as I did, near a standing stone of sea and land. Use its fifth line to reveal the meaning of this cipher:

PAMFCHQDPHEFOFNMKLSHZMD

The answer will place in your hands two digits that will guide you to my nautilus gears' place of concealment. Onward!
